

Australia-Japan: Science & technology diplomacy and public policy

Researchers in Okinawa and Townsville work together to understand the crown of thorns threat to coral reefs.

Hear advisors to government on the role of science and technology in diplomacy and policy. Learn what makes successful research collaborations.

The Australian National University and the University of Tokyo have joined together to lead a forum on Science & Technology Diplomacy and Public Policy in Tokyo on Monday November 5 2018.

Researchers, the public sector and the business community will discuss how scientific and technology collaboration affects diplomacy and the role of scientific advice to government. Program includes a **keynote address by Professor Kishi Teruo, Science and Technology Advisor to the Minister for Foreign Affairs.**
